1. SYSTEM MODULES

The **main building blocks** of the Church Management System.

---

1. Authentication & Access Control Module

Controls who logs in and what they can see(admin or user).

Requirements:

- User login system (email + password)
- Role assignment (Admin / Member)
- Session management (stay logged in)
- Access restriction (admins see everything, users see only their data)

---

2. User & Member Management Module

Store and manage all member information.

Requirements:

- Create and manage member profiles
- Store:
    - Personal info (name, contact)
    - Attendance history
    - Tithe & offering records
    - Partnership status & promises
- Member directory (visible **only to admins**)
- Profile viewing (users see only their own profile)

---

3. Communication (Messaging/Inbox) Module

Central communication system (like Gmail).

Requirements:

- Admins send messages to:
    - All users
    - Specific groups
    - Specific individuals
- Inbox system:
    - Messages show sender (admin)
    - Messages sorted by time
- Users can:
    - Read messages
    - Respond or ask questions
- Messages are **targeted** (not everyone sees everything)

---

4. Groups (Connect Groups) Module

Manage smaller church groups.

Requirements:

- Create groups (by admin)
- Assign users to groups
- Group-specific communication
- Group event targeting
- Group-based interaction

---

5. Events Management Module

Manage church and group events.

Requirements:

- Admin creates events
- Events can be:
    - General (for all users)
    - Group-specific
- Events are sent to:
    - Inbox (main system)
    - Group spaces
- Users receive reminders for events

---

6. Prayer Request Module

Allow spiritual interaction within groups.

Requirements:

- Users post prayer requests in groups
- Requests are:
    - Visible to group members
    - Highlighted or pinned
- Requests stay visible for group awareness

---

7. Attendance Tracking Module

Track member participation.

Requirements:

- Record attendance per event/service
- Link attendance to member profile
- Admin can view attendance history
- Stored per user over time

---

8. Tithes & Offerings Module

Track financial contributions.

Core Requirements:

- Record:
    - Tithes
    - Offerings
- Link records to individual users
- Display in:
    - Member profile (admin view)
    - Personal view (user sees own data)
- Should be **interactive and engaging**

---

9. Partnerships & Promises Module

Track commitments made by members.

Requirements:

- Record partnerships
- Track promises made by members
- Monitor if they are:
    - Following up
    - Fulfilling commitments
- Admin visibility for tracking

---

10. Sermon Management Module

Provide access to spiritual content.

Requirements:

- Admin uploads:
    - Sermon recordings
    - Videos
- Admin controls:
    - What users can see
    - What is available
- Central storage for all sermons

11.Personal Notes Module

Allow users to engage with sermons.

Requirements:

- Users can:
    - Write notes per sermon
    - Save notes
    - Revisit notes later
- Notes are personal (not shared)

---

12. Notification & Reminder Module

Keep users informed.

Requirements:

- Notify users of:
    - New messages
    - Events
    - Group activities
- Event reminders (before event time)
- Notifications linked to inbox and groups

---

2. TIER-SPECIFIC REQUIREMENTS

Now we clearly separate **what Admins can do vs what Members (Non-Admins) can do**.

ADMIN TIER (Full Control)

Admins have **complete system visibility and control**.

Capabilities:

- Manage users (create, update, view all profiles)
- Access full member directory
- View:
    - Attendance records
    - Tithes & offerings
    - Partnerships & promises
- Create and manage:
    - Groups
    - Events
    - Sermons
- Send targeted messages (to all, group, or individuals)
- Control what content users can access
- Monitor engagement and participation
- Oversee prayer requests in groups

MEMBER TIER (Restricted Access)

Members have **personalized and limited access**.

Capabilities:

- Log in and access personal dashboard
- View:
    - Personal profile
    - Personal attendance
    - Personal giving (tithes & offerings)
    - Personal partnership status
- Receive and read messages (targeted)
- Respond to messages
- Join and interact in groups
- View events assigned to them
- Receive reminders for events
- Post prayer requests in groups
- Access sermons allowed by admin
- Write and manage personal sermon notes

Key System Rule (Very Important)

- **Admins = Full visibility of all users and data**
- **Members = Only their own data + targeted shared data**

This rule must be enforced at **every module level** (security + database queries).

Final Structure Insight

Think of your system like this:
